

## Area and Perimeter

**Remember:**

**Area of a parallelogram: base x height      Area of a rectangle: base x height**

**Area of a triangle:  $\frac{1}{2}$  (base x height)      Area of a circle:  $\pi \times \text{radius}^2$**

**Circumference of a circle:  $2 \times \pi \times \text{radius}$  or  $\pi \times \text{diameter}$**

Find the area and perimeter (or circumference) of the following figures. Measure using centimeters.  
Round areas, perimeters, and circumferences to the nearest tenth of a centimeter.
